More than 93 percent of healthcare organizations **have experienced a data breach** over the past three years

Herjavec Group

Lost business is accounted for nearly 40% of the average cost of a data breach.

IBM

Did you know a harmless-looking email like this can cost you financial loss, brand reputation, and very likely, **your business?**

Hackers now divert their focus on smaller companies with tighter bottom lines, limited IT resources and, in most cases, overwhelmed by the day-to-day work. It's a challenge for you to be up to date on security measures.

This trend is on the rise, with **more Dental Practices being targeted year over year...**

SO HOW TO PROTECT YOUR BUSINESS & **NOT PAY THE RANSOM?**

SPECIALIZED IT SERVICES

FOR DENTAL & HEALTHCARE PROVIDERS

*Let us take care of your IT so you can focus on what matters most – **your patients!***

Metallic's Managed Security Solution offers a complete range of services that can meet all technology, security and budget parameters, making it an ideal solution for your business. Our team will help you focus on your core business while we stay on the frontlines to defend you from cyber threats evolving at a lightning-fast pace.

| **What's Included?**

- A comprehensive security health check for the entire network
- Client-specific security scorecard using data collected via network health check as a baseline against Metallic's scorecard
- Recommendations with 1-2-3 year security roadmap
- Monthly reports for ongoing transparency
- Evaluating network health every quarter & providing updates and recommendations as required
